

Seattle | Portland
Art glass exploration
(October 20–26, 2013)

Glasstronomy Studios is teaming up with our friends at Stained Glass Stuff in Ottawa for a trip to Seattle and Portland. Join us on a tour of the region's glass factories, galleries and museums, studios and more For itinerary and pricing information, email info@glassstronomystudios.ca.

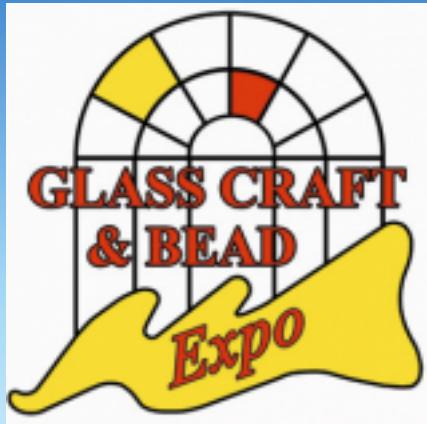

An information night will be held on April 23, 2013, at 7 pm.

Membership services

Since opening last fall, our membership community has steadily grown. Familiar and new faces have joined and embraced the Studio, its culture and events. We've had great fun getting to know you at the events we hosted for our Community+, Artist, Instructor, and Studio members. From the fast paced first members' "cook-off" and the December pot luck social to Lis Simpson's lamp working session, and the recent stringer extravaganza, you have shown great courage, creativity, energy and humour.

Look forward to the Instructors' glass cook-off on **April 28, 2013**, where madness and mayhem continue in the Studio arena when instructors pair up with members in friendly competition against other teams. For a more refined experience, bring Mom or a guest for English afternoon tea on Mother's Day, **May 12, 2013**. Get cracking on your art projects in preparation for our first Spotlight art show on **June 1 and 2, 2013**, and showcase your favourite recent work in any art medium (glass, photography, painting, metal, wood, etc.). Check the Events page on our web site in the next couple of weeks for more details.

2013 Glass Craft and Bead Expo

We are excited to attend the premier Art Glass and Bead Trade Show and Educational Conference held in Las Vegas April 3–7. Joining others from all over the world we will take classes and view all of the latest and most innovative products and services in our industry. We look forward to sharing all we learn with you.

Ottawa, *here we come!*

Join us in Ottawa, March 22–24, 2013 at Stained Glass Stuff for Kiln Casting: glass blocks. Network with others during this three-day intense workshop while exploring three different casting methods: kiln-melting, stack firing and the three-dimensional puzzle. Deep cast firing, loose fiber damming and cold working will also be covered. Contact edu@glasstronomystudios for more information.

Studio hours

The Studio will be operating on a different schedule for the month of March and the first week of April. We will be closed on Sundays and our Thursday hours change to 10 am–5 pm. Please check our web calendar at glasstronomystudios.ca or call ahead at 1.855.415.9777 to be sure we are here to serve you. We apologize for any inconvenience and hope to see you another day.

Regular hours resume April 9, 2013. **Thank you!**
