

## Custom work | Glass application sampler sheet

*Art glass is an investment.* When you are ready to acquire, consider the options that are available to you.

**Glasstronomy Studios** specializes in one-of-a-kind pieces that are custom-made to enhance your private or public space.

Whether incorporating architectural features, such as windows or doors, cabinetry inserts and hardware, privacy screening, vessel sinks or lighting, or full-blown art pieces that complement your personal aesthetic, every glass project is designed and fabricated by hand in our Studio space.

Art glass can be created in many ways. At **Glasstronomy Studios**, we focus on stained glass, fused glass, and mosaic glass techniques. When designing for two- or three-dimensional projects, we may incorporate one or more technique for visual interest, as well as paint and other inclusions depending on what your budget allows.

**Look at our technique samplers and open your mind to the possibilities!**
