

Artist statement

Melanie Kidd

With inspiration and innovation I approach the design and construction of every glass art piece I create and every course or workshop I lead. I believe nothing is impossible, just not yet discovered. Artistic development is discovered through experimentation and that there is no limit to what can be achieved with patience and dedication. I apply this motto to my art glass strategies, designs and projects. I consider people today and aim to enlighten and make art glass accessible to them all.

The joy is in the execution.
