

Members' only workshops and courses – Spring 2023

Welcome to Glasstronomy Studios' learning program. This calendar outlines special members' only workshops and courses offered in May and June 2023. *Registration is now open.*

We have a special place in our hearts for our loyal membership. You have supported us through challenging times, participated in our hare-brained activities, cheered and shared in champion moments, all with lots of laughter, and you have inspired us to grow and learn and share everything we know.

Creating glass sculpture is a joy we love to share. The challenge to make functional and interactive sculpture with glass and metal is a particular favourite.

This spring, we have a couple of special learning offerings just for you! As these workshops are for members' only (Artist, Studio, and Small Business Arts Mentorship Program members), the prices have been significantly reduced to reflect firing, material, and studio time discounts.

Payment registration: To register, we accept payment in person (cash, Debit, MasterCard, and Visa), by email (e-transfer), or by phone (MasterCard and Visa). Please note that HST will be added to the listed fee at time of payment.

Cancellation policy: A Studio credit will be issued for cancellations up to 48 hours before start date. We regret that Studio credits will not be issued under the 48-hour threshold.

Studio credits can be applied to a future purchase of a workshop or course.

Workshop

M2023-5

Fused glass and metal wind spinner

When: Saturday, May 13, 2023, from 10 am to 4 pm

Fee: \$379 + HST (includes frit, scrap, fibre, wire, adhesives, paint, and metal armature) + Glass package (optional)

96 COE fusing glass package (only 4 kits available) | \$148 + HST (Not the same glass as in sample)

Watch the colours spin and shine in the sun with this wind-powered wind spinner. Members will learn how to tack fire and slump in one firing, create molds using found kiln furniture, as well drill and wire fused glass, to create a 6-foot tall, 2-foot circumference fused glass and metal wind spinner.

Frit, scrap glass, fibre, wire, adhesives, paint, and metal armature included. Glass package optional.

96 COE Fusing glass package: 1-1/2 sq. ft. Aventurine Green, 1 sq. ft. Polar Vortex Fusers Reserve, 2 sq. ft. Hydrangea Opal, ½ sq. ft. Orange Cathedral

Course

M2023-6

Fused and foiled floral wall sconce

When: Thursdays, June 1, 8, and 15, 2023, from 7 to 10 pm, and Saturday, June 17, 2023, from 10 am to 12 pm

Fee: \$547 + HST (includes copper, solder, chemicals, wiring, and metal armature) + 4 sq. ft of stained or fused sheet glass

Bring the wow factor to your decor! Use those big, beautiful pieces of stained glass you have stashed away for this focal fused and foiled glass and metal light fixture. This course will highlight fused/stained sheet glass, copper overlay holders, and hands on electrical instruction. Members will create three floral-inspired lamps that will be wired and applied to a metal armature for lighting. The fixture is approximately 2-foot x 3-feet in size and is suitable for interior and sheltered exterior spaces.

*Copper, solder, chemicals, wiring, and metal armature included. Approximately 4 sq. ft. of stained or fused sheet glass **not** included.*
